

I love the caller protection setup that we have in Wisconsin and I do not want to have this changed!

Since being signed up for this I get little to no sales calls (except Fundraising). I use to get calls daily and several at that. It was frustrating and the level of protection that this plan has provided is great! I don't want that changed to have exceptions outside of the Fundraising item (which I would even like to be eliminated too). I should have the choice to get these calls or not and this is the only protection that limits it (and very well at that). I use to have to call vendors all the time to request to be on their no call list which would often take months to get in place and time to try and reach each company calling me to try and sell something. That process was a huge pain!

I do not wish a federal program to lessen the protection I have now. It's bad enough to get hit by advertising in the mail and on the computer as that exists today but at least I can choose to ignore or block those where these phone calls often take time to even get them off the line and they are often rude.

Please do not limit the coverage of our existing Wisconsin No Call plan based on what the Federal one will be!
